1. The following is a Notice of Allowance in response to Amendment received on 21 May 2004. Claim 10 has been amended. Claims 1-10 are pending in this application.

REASONS FOR ALLOWANCE

2. Claims 1-10 are allowable.

3. The following is an examiner's statement of reasons for allowance:

As per claim 1, the prior art of record taken alone or in combination fail to teach delivering the finite element analysis mesh coordinates to a thermal analysis model, the thermal analysis model including an analytical solution model and a finite element analysis model; determining a thermal analysis of the welding process as a function of at least one of the analytical solution model and the finite element analysis model, the analytical solution model being adapted to provide a thermal history of the welding process for a global distortion analysis, and the finite element analysis model being adapted to provide a thermal history of the welding process for a detailed residual stress analysis.

As per claim 8, the prior art of record taken alone or in combination fail to teach a thermal analysis model adapted to receive the finite element analysis mesh,

determine a thermal analysis of the welding process, and responsively provide a thermal history of the welding process, wherein the thermal analysis model includes: an analytical solution model adapted to provide a thermal history of the welding process for a global distortion analysis; and a finite element analysis model adapted to provide a thermal history of the welding process for a detailed residual stress analysis; and a structural analysis model adapted to provide a structural analysis of the welding process as a function of the thermal history.

As per claim 10, the prior art of record taken alone or in combination fail to teach; determining a thermal analysis of the welding process as the total analytical solution and one of an analytical solution model or a finite element analysis model, the analytical solution model being adapted to provide a thermal history of the welding process for a global distortion analysis, and the finite element analysis model being adapted to provide a thermal history of the welding process for a detailed residual stress analysis.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
